## Air vacuum kits

### SCREW GRIPPING SYSTEM FOR ASSEMBLY TOOLS

The assembly of non-magnetic or small screws is delicate or even difficult when access to the screwing point is restricted.

Air vacuum kits, holding the screw by vacuum at the end of the screwdriver, make it possible to:

- ▶ Free up the operator's hand and make it easier to assemble your application
- ▶ Reach screwing points that are difficult to access (shafts, small space, etc.)
- ▶ Avoid unexpected fall of screw into your products
